INTRODUCCION

Con la nueva organizacion dada a la Superioridad de la Armada Nacional, el Servicio Meteorológico Marítimo, que ántes de 1899 era atendido por la Estacion Central de Meteorología establecida en Santiago, pasó a depender directamente de la Direccion del Territorio Marítimo.

El presente volúmen, primero de esta serie, corresponde a 1899, y contiene las observaciones practicadas durante el año, por 16 observatorios establecidos en nuestro litoral.

Algunos de ellos no han practicado observaciones durante todo el año, por los inconvenientes que siempre presenta un servicio recién establecido.

Se encuentran completos los datos de las Estaciones de Iquique, Punta Tortuga, (Coquimbo); Punta Anjeles, (Valparaíso); Punta Galera, (Valdivia); e Islote de los Evanjelistas, (Estrecho de Magallanes).

La Direccion del Territorio Marítimo, ofrece dar el segundo anuario, correspondiente a 1900 con datos completos, pues, ya en ese año, se ha normalizado la marcha del Servicio Meteorológico.

Las observaciones que se practican son de dos clases;

1.º—*Observaciones diarias* tres veces en el dia durante todo el año, sin esceptuar domingos y feriados. Antes se practicaban estas observaciones a las horas siguientes: 7.30 A. M., 1.30 P. M. y 9 P. M.; pero a mediados de 1899 se cambiaron las dos primeras horas por las 8 A. M. y 2 P. M., respectivamente, con el objeto no solo de estudiar nuestro clima, sino de concurrir a las observaciones simultáneas; porque, siendo las diferencias de longitud relativamente pequeñas entre las distintas estaciones meteorológicas de nuestro territorio, los

errores al aceptar una sola hora local, no son de mucha consideracion, no influyendo, por consiguiente, en los datos que damos a la publicidad.

2.º—*Observaciones Tri-horarias*: practicadas en tres fechas distintas de cada mes a las horas siguientes: 12 A. M. (media noche y principio del dia), 3 A. M., 6 A. M., 9 A. M., 12 M., 3 P. M., 6 P. M. y 9 P. M.

A escepcion de la variacion introducida en las dos primeras horas para las observaciones diarias, se ha continuado practicando éstas y las tri-horarias, segun el método adoptado por el Observatorio Astronómico de Santiago.

Al presente volúmen, se agrega un mapa que señala la ubicacion de las estaciones meteorológicas y un cuadro impreso en papel de color, que dá con exactitud las coordenadas jeográficas que corresponden a cada observatorio, como asimismo su altitud, a fin de que se aprecien con toda precision los datos necesarios al mundo científico.

El cuadro anexo obedece a que, a varios observatorios se les dió coordenadas que no estaban revisadas, dando algunos minutos y segundos de diferencia, datos que no se han corregido al hacer la impresion, a causa del retardo con que se ha publicado el "**Anuario Hidrográfico**" del año 1899, en donde están rectificadas.

Arturo Fernandez Vial.

Contra-Almirante.

DIRECTOR DEL TERRITORIO MARÍTIMO.

ADVERTENCIA

Al hacer los gráficos de las Observaciones Meteorológicas, después de publicados los Anuarios de 1899 y 1900, se han notado en los Estados de Observaciones de Punta Carranza, (que corren: las diarias, de 310 a 317, en el Anuario de 1899; y las diarias de 122 a 145; y las trihorarias, de 386 a 397) errores en varias lecturas barométricas, que las inutilizan para un estudio científico. Por lo que, esta Dirección ha determinado condenarlas como si no se hubieran efectuado.

Valparaíso, Febrero 10 de 1903.

El Director del Territorio Marítimo.

ADVERTENCIA

Al hacer los gráficos de las Observaciones Meteorológicas, después de publicados los Anuarios de 1899 y 1900, se han notado en los Estados de Observaciones del Faro de Punta Carranza, (que corren: las diarias, de página 102 a 123; y las trihorarias, de 310 a 317, en el Anuario de 1899; y en el de 1900: las diarias de 122 a 145; y las trihorarias, de 386 a 397) errores en varias lecturas barométricas, que las inutilizan para un estudio científico serio, por lo que, esta Dirección ha determinado condenarlas y considerarlas como si no se hubieran efectuado.

Valparaíso, Febrero 10 de 1903.

El Director del Territorio Marítimo.
